

Central Intelligence Agency

D.C. 20505

29 January 1982

NOTE FOR:

25X1

Executive Officer, National Intelligence Council

SUBJECT: 1983 Budget Submission

In response to your note of yesterday, I am forwarding some minor changes to the Nuclear Proliferation section of CIA's 1983 Congressional Budget Submission (written in red ink on the attached). It seems to me that in conjunction with the Community effort, NIO perspectives on specific target areas (similar to what were prepared recently for the DCI covering 1981) would serve as an important part of the basis for projecting Community resource needs. Indeed, I believe some such approach is mandated (for the long term anyway) in Admiral Inman's 12 November 1981 memorandum on the planning process. I'd be interested in knowing if NIC and the NIOs are, or will become, involved along the lines suggested.

25X1

VC/NIC (w/o att)

FOR:

☐

RL, NIOs

SA/NPI

Please take a quick look at the attached galleys of material from the 1983 Congressional Budgets Submission for your area of responsibility and let me know by 1600 hours tomorrow, Friday 29 January, if you have a major problem of any sort with any part of the text. (The Office of the Comptroller apologizes for the short fuse, but these materials were not ready for our review until today and they need our coordination by c.o.b. tomorrow.)
